400078	1 Anti-Seize
302305	1 Installation Instructions

ATTENTION!! ANTI-SEIZE MUST BE USED ON THE 3/8"-16 X 1-3/4" HOLLOW HEX BOLTS

NOTES

These Silver Bullet kits allow you to be the designer. They are packaged without any specific mounts or brackets as they are intended for use in unique or specialized applications.

Other than designing and fabricating your own brackets, you can use existing surfaces such as luggage, cruise or forward control plates, fender struts or specialized clamps like our "Magnum Quick Clamps"(3/8" hardware only) for mounting.

The Hidden Wiring Kits include bolts that are 1-3/4" long. On some applications these long bolts may contact the bulb or plug inside the light casing before the they can be tightened completely. If you encounter this situation, simply shorten the bolt using a hack-saw or "cut-off" tool.

WIRING PROCEDURE

FRONT: For running lights only, connect the single power lead from the light to the blue lead from the turn signal wiring harness (H-D). For turn signal only, connect the lights single power lead to the violet wire from the bikes turn signal harness. For dual function, Kuryakyn P/N 4865 Run/Turn Controller is needed. Installation instructions are included with that kit.

REAR: The light is grounded by its connection to the chassis. For turn signals only, connect the single power lead from each light to the turn signal positive leads on each side. (H-D is violet right and brown left.) **FOR TURN SIGNAL ONLY FUNCTION ONLY WITH HALOGEN LIGHTS, DO NOT USE A LOAD EQUALIZER!** For multi function, use the Kuryakyn Run-Turn-Brake Controller for your specific application (sold separately). We do not recommend using Halogen Silver Bullets with red lenses directly as running lights. Excessive heat is likely to cause lens breakage.

Once these lights have been installed and wired seal the wire's passage in the hollow bolt with Silicone to keep water from entering the Silver Bullet housing.

NOTE When using Halogen Silver Bullets as turn signals only, if the lights do not flash when the turn signal button is pushed, change the bulbs in the front signals from 35W to 20W.

Ride On!

LIMITED WARRANTY

Kuryakyn warrants that any Kuryakyn products sold hereunder, shall be free of defects in materials and workmanship for a period of one (1) year from the date of purchase by the consumer excepting the following provisions:

- Kuryakyn shall have no obligation in the event the customer is unable to provide a receipt showing the date the customer purchased the product(s).
- The product must be properly installed, maintained and operated under normal conditions.
- Kuryakyn makes no warranty, expressed or implied, with respect to any gold plated products.
- Kuryakyn shall not be liable for any consequential and incidental damages, including labor and paint, resulting from failure of a Kuryakyn product, failure to deliver, delay in delivery, delivery in nonconforming condition, or for any breach of contract or duty between Kuryakyn and a customer.
- Kuryakyn products are often intended for use in specific applications. Kuryakyn makes no warranty if a Kuryakyn product is used in applications other than intended.
- Kuryakyn electrical products are warranted for one (1) year from the date of purchase by the consumer. Components of Kuryakyn products containing L.E.D.s will be warranted for defects in materials and workmanship for 3 years from the date of purchase.
- Kuryakyn makes no warranty of any kind in regard to other manufacturer's products distributed by Kuryakyn. Kuryakyn will pass on all warranties made by the manufacturer and where possible, will expedite the claim on behalf of the customer, but ultimately, responsibility for disposition of the warranty claim lies with the manufacturer.
